

ceCMG - 20 Years of Ongoing Success!

Annual German CMG Conference in Hamburg, May 27th – 30th 2008 – From System to Service Management

Even after 20 years of existing, the vision of the CMG Community is still the same: being and providing a platform for information and knowhow exchange on an international high standing expert level. To transfer this vision into daily work some assumptions have to be met: neutrality, independence and openness, strong practical affinity and actuality.

This combined with an elaborate social networking factor was to be found at the annual German CMG Conference in May in Hamburg. Different topics such as System & Security, Mainframe & Special Engines, Performance & Tuning, Controlling & Cost, IT Services, SOA & ITIL and last but not least Open Source were performed by highly experienced Speakers on an international level. With Glenn Anderson, IBM Training-Systems and Technology Group (CMG USA), winning the speakers award for the best paper and the best performance during the conference, the international and outstanding niveau was again manifested as in the years before.

To learn more about the German Conference and especially to get to know the new face and the new public relation strategy of the ceCMG (Central Europe Measurement Group), we invite you to visit our newly relaunched online magazine „ceCMG Online“ on our homepage. All presentations, impressions of the conference, additional information on speakers and networks can be found there. This online magazine is our first step into a higher awareness of the ceCMG within the IT community and is designed to meet the members need for information in an up to date way.

If you want to get to know more about the ceCMG, our topics and activities please feel free to get in contact with us.

Yours sincerely
Wolfram Greis, Speaker of the Board Members
